TACTICAL ANALYSIS

The objective, as usual, is to move the ball and to win the opposition of the defensive lines of the opponent (from S1 to S4).
The context is strictly connected with the space.
The opponent stay low and pay attention to cover the space in depht and between the lines (sector 3).
The full occupancy of that spaces allow us to build up without too much pressure..

TECHNICAL AND STRATEGICAL MODALITY TO WIN THE DEFENSIVE OPPOSITION

1) Individual action (dribbling, driving)
2) Trigger (assist or pre-assist)
3) Combination
>> simple (between two players)
>> composed (between two players)
>> complex (between three players)
4) Fitting (link player)
5) Rotation and/or interchange

> THE RULES TO BUILD GOOD ACTIONS

How to build a good action, winning the opposition of the defensive lines?

- Remember the phases
  - > Building up (S1)
  - > Addressing (S2)
  - > Going up (S3)
  - > Shooting (S4)

- How can we put our players in the spaces? Which rules?

INSIDE THE PENALTY BOX
To score (PRIORITY) is really important to attack the penalty box with more players (in the right moment, in the right spece) and to win the duels.
The positions of the players inside the penalty box depends on the zone of the assist.
We need to be good not only to attack the penalty box but also to win the rebounds and to react in transition (dirty match).

TO SUMMARIZE

1) Surrond (encircle) the defensive block
2) Expand (or decrease) the spaces between the lines (sector 3);
3) Occupy the assist zone;
4) Use double channels;
5) Attack the penalty box
6) Attack the rebounds
7) Ready in transition (dirty game)

To play efficiently and successfully the quality of the ball possession is really important.
